HRS R Series scraped surface heat exchanger is designed for challenging heat transfer applications in both hygienic and industrial applications.

In addition to the standard R series a heavy duty version is available. The HRS RHD Series has been developed for the more demanding applications with extreme viscosities.

The RHD has all the features and benefits of the standard R Series but with increased motor size and scraping rods. Extra mounting supports for the scrapers and motor enable the unit to be used under challenging conditions.

TECHNICAL DATA

APPLICATIONS
Viscous and Fouling Fluids
Heating
Cooling
Evaporation
Crystallisation

SURFACE FINISH
External: Polished
Internal: <0.8μ

STANDARD MATERIALS OF CONSTRUCTION
Service Side: AISI 304 Stainless Steel
Product Side: AISI 316L Stainless Steel
All other material options available

STANDARD DESIGN CONDITIONS
Service Side: 10 bar/185°C
Product Side: 21 bar/185°C

FEATURES
• Continuous scraping action enhances mixing of highly viscous products
• Spiral blade and scraper design reduces pressure drop, with improved heat transfer
• Multitube option for reduced footprint, energy consumption and operating costs
• Unique sealing system enables removal and replacement of individual tubes
• Multipass version available
